

ADD CUSTOMERS THROUGH LOCAL LISTINGS

There is nothing more powerful than social proof. In fact, 87% of people pick a local business based on reviews featured in local listings. These listings are online profiles that contain your business name, address, phone number, and customer reviews. Search any business name and the local listing will appear prominently in the results.

Having clean, accurate data and positive reviews displaying consistently across local listings is vital to the success of your business. Yet business owners often feel overwhelmed and helpless in the face of scores of listing services, many offering little control over customer reviews.

Let Kinetic help manage your reviews. We give you the tools to get more 5-star reviews, improve your business profile ranking and convert more visitors to customers.

Take control of your reviews

Consistent listings = SEO credibility

Listing optimization is one of the simplest, most powerful ways to rank higher in search results and showcase your business through reviews from real people in real time. Kinetic can optimize your business profiles on over 40 platforms like Google, Yelp and Facebook as well as automate the review process to improve your online presence.

In a fraction of the time it would take to manage all of these individual platforms and solicit reviews from customers, you can be outperforming your competition — without paying for ads.

So how do you set up and manage your listings, get a steady stream of positive customer reviews and still find the time to run your business?

With Kinetic Reputation Management, you get access to the tools and expertise to manage all of your local listings and reviews from one convenient location. No need to login to 40 different websites and endlessly call, text and email customers chasing down reviews. In fact, Kinetic can manage the entire process so that you can focus on creating a great experience for your customers, not managing your online listings.
